

NU LIPA

SDG 4. Quality Education

Objectives:

3.3.1 To teach learners essential computer skills, with a focus on Microsoft Word and PowerPoint;

3.3.2 To provide students the information and knowledge about basic computer skills that they need in higher level of education;

3.3.3 To give students an opportunity to improve their computer and internet literacy that they can use to their advantage in terms of education and in future work.

Event Details:

What: 'PRODIGY: Proficiency in Office tools and Digital Guide for the Youth

When/ Time: November 8, 2023/12:00-1:30pm

Who: Grade 6 students

Where: Edilberto L.Mendoza Memorial Elementary School, Brgy. Latag, Lipa City

The NU Lipa Computer Science Department COM221, under the subject of NSTP-CWTS 2, aims to provide the students with the fundamental skills and knowledge, focusing on using Microsoft Word and power point for educational purposes. The team intends to offer a workshop and training session design from the students to learn how to create documents, presentations, and basic digital projects. By equipping our young learners with these essential skills, we aim to enhance their educational experience and prepare them for future academic challenges.

The Prodigy project reached its peak with the discovery of vital digital projects. It acts as a link between knowledge and application, encouraging students to use their newly acquired abilities in practical scenarios. The emphasis on project selection, material collecting, and media integration reflects our effort to encourage youth creativity , critical thinking and digital literacy.
